Logeshwaran Angusamy

I build access control that assumes breach, and I explain it in plain language.

Cybersecurity • IAM • Penetration Testing • Ethical Hacking

PROFILE

From electrical engineer to IT client work to cybersecurity: I combine systems thinking, client understanding and a clear security focus. For my master's thesis I designed and built a Zero Trust access model on AWS and tested it against privilege escalation. My goal as an IAM Specialist, Security Analyst or Penetration Tester: the right people get the right access at the right time – and no one else.

Zero Trust on AWS
Master's thesis with Cognito, IAM, Verified Access, STS and CloudTrail: least privilege and full auditability.

Attacker mindset
Nmap, Burp Suite, Metasploit, Wireshark; TryHackMe labs and CEHv12 training.

Bridge to the client
Experience in client service and business development for IT and fintech clients.

SKILLS

IAM	AWS IAM, Cognito, Verified Access, RBAC/ABAC, SSO, MFA, OIDC, SAML
Security Tools	Nmap, Burp Suite, Wireshark, Metasploit, FTK Imager, Volatility
Ethical Hacking	Footprinting, network scanning, enumeration, vulnerability analysis, system hacking, privilege escalation (CEHv12 training)
Attack Techniques	Malware threats, sniffing, session hijacking, social engineering, web server and web application attacks, SQL injection
Pentesting	Vulnerability assessment for web, OS and blockchain environments (TryHackMe, Hardhat)
Further Topics	Wireless security, cloud security, cryptography, IDS/firewall evasion
Forensics & Risk	Digital forensics, threat modelling (STRIDE), risk analysis
Blockchain	Web application and smart contract security, authentication hardening, SQL injection mitigation

EDUCATION

09/2024 – 02/2026

Master of Science, Cyber Security
Arden University, Berlin

- Focus: Identity & Access Management, Zero Trust, Penetration Testing, Digital Forensics
- Implemented Zero Trust models in simulated AWS environments with RBAC/ABAC policies, MFA and end-to-end access control
- Practical work with Nmap, Burp Suite, Metasploit, Wireshark, FTK Imager and Volatility in labs and projects

04/2015 – 05/2019

Bachelor of Engineering, Electrical and Electronics Engineering
Sethu Institute of Technology, Virudhunagar, Tamil Nadu, India

- Foundations in electrical systems, control systems, embedded systems and power electronics
- Workshops on smart grids, renewable energy and networked industrial systems (critical infrastructure protection)

PROJECTS

09/2024 – 01/2026

Master's Thesis: Zero Trust Access Control on AWS
Cognito, IAM, Verified Access, Conditional Policies

- Built a Zero Trust security model on AWS using IAM, STS and CloudTrail in a cloud-native environment
- Enforced least privilege, role-based access and continuous auditability
- Tested and validated protection against unauthorized access and privilege escalation

Mini Projects

Serverless security monitoring (AWS): real-time detection with Lambda, EventBridge, a detection engine, SNS alerts and DynamoDB

Blockchain & zero-knowledge proofs: secure authentication and access control system

Smart Contract: Hardhat/Solidity contract with a Python Web3 bot on the Ethereum Sepolia testnet

WORK EXPERIENCE

04/2024 – 07/2024

Business Development Executive (IT)

Fire-bee Techno Services

- Advised finance and technology clients on blockchain-based crypto trading platforms, focusing on secure transactions, scalability and compliance
- Prepared tailored proposals and delivered technical demos of blockchain use cases and security features with cross-functional teams
- Identified new markets and built client relationships in fintech and cybersecurity

06/2022 – 06/2023

Client Service Associate (US Shift, IT)

eGrove System Corporation Private Limited

- Generated and qualified leads for US clients via Upwork, LinkedIn and email
- Wrote proposals and content for IT service bids and RFPs
- Managed client communication and coordinated with technical teams to align solutions with client needs
- Maintained sales pipelines and supported revenue growth through targeted outreach

TRAINING

11/2024

EC-Council CEHv12 – Complete Series (Volumes 1–4)

Through Arden University (EC-Council Academia); in-depth training in ethical hacking methodology and attack techniques

LANGUAGES & ADDITIONAL

Languages English: fluent | German: B1

Work authorization Authorized to work in Germany (valid visa); no employer sponsorship required
